About Us

Sree Lakshmi Engineering was founded in the year 1965 by Mr. V. Ganesan in the city of Chennai. With a total of 54 years of experience in this field, our quality, precision, and work ethics have earned us the title of being one of the most sought after overall infrastructure solution providers in the country.

Who We Are?

- This company was established with the main objective of becoming a leading solution provider for Pre-Engineered Steel and Metal Constructions.
- Sree Lakshmi Engineering has been instrumental in providing a boost to infrastructure projects in the city and in south India at large, particularly with respect to the Steel and Metal-based construction projects and all civil and commercial buildings.

Our Vision

Our prime vision is to reach the zenith in the Field of structural buildings, roofings and warehouses by adopting the state of the art technology with infrastructure, manpower, design, engineering, manufacturing and project management.

Our Values

The most things we value are innovation, services and up to date technology through R&D, and we are dedicated to using the same in an E.A.S.E Mode to have sustainable growth and development of the community as a whole.

Why Choose Us?

- The company is known for using only the best infrastructural tools and equipment that helps us maintain our quality standards. Be it the CNC Plasma Cutting machine or the Sub Arc Welding Trackers or any other equipment or tool used for our construction projects, we ensure that all of these are state-of-the-art and deliver high quality performance and productive outputs with the least possible inputs in terms of costs.
- The practice to make sure that we use only the best in the business to complete our projects ensures that all our projects both efficient and (cost) effective.
